

IPP Global Inc

Corporate Profile

About us

Mission Statement

Providing clean energy solutions for a sustainable future

Vision Statement

Reduce global power generation carbon footprint and boost economic growth one project at a time.

About us

IPP Global is an Energy company with a focus on renewable, sustainable and clean energy. Our objective is to provide sustainable energy sources to users across the world.

We are deeply invested in ensuring that we provide alternative but sustainable sources of energy and leverage our unique relationships to provide best in class solutions for our unique customers in a manner that reduces their carbon footprint, has minimal negative impact on the environment, is sustainable and ultimately, economical over the long term.

Our Values

IPP Global has an unwavering belief that people are critical to our success. We put people at the heart of all that we do, and we are very aware of the impact of our actions, processes and policies on people. People matter, be it our clients, co-workers, host communities, suppliers or other stakeholders. Our ecosystem is filled with people who share our core values. They are: Passion, Creativity, Focus and Curiosity.

Passion

As passionate professionals, we are dedicated to delivering our promise to our clients with an unparalleled drive to create results.

Creativity

Our drive for innovation pushes us to look for better and more efficient ways of meeting our obligations to our stakeholders.

Focus

We focus on innovative operational solutions that are cost and time efficient and make the most of every available resource to ensure our clients are always at an advantage.

Curiosity

We constantly explore opportunities and push the boundaries to find innovative solutions by asking questions, testing out theories and trying out new ways of solving world energy problems.

A conceptual image featuring a human hand holding a glowing, pixelated Earth. A network of white lines and dots is superimposed over the globe. The background is a warm, orange-hued sunset or sunrise sky, with several wind turbines visible as silhouettes. The overall theme suggests sustainable technology and global connectivity.

**What
we offer**

What we offer

Gas processing and Virtual pipeline solution

Normally flared
high BTU gas

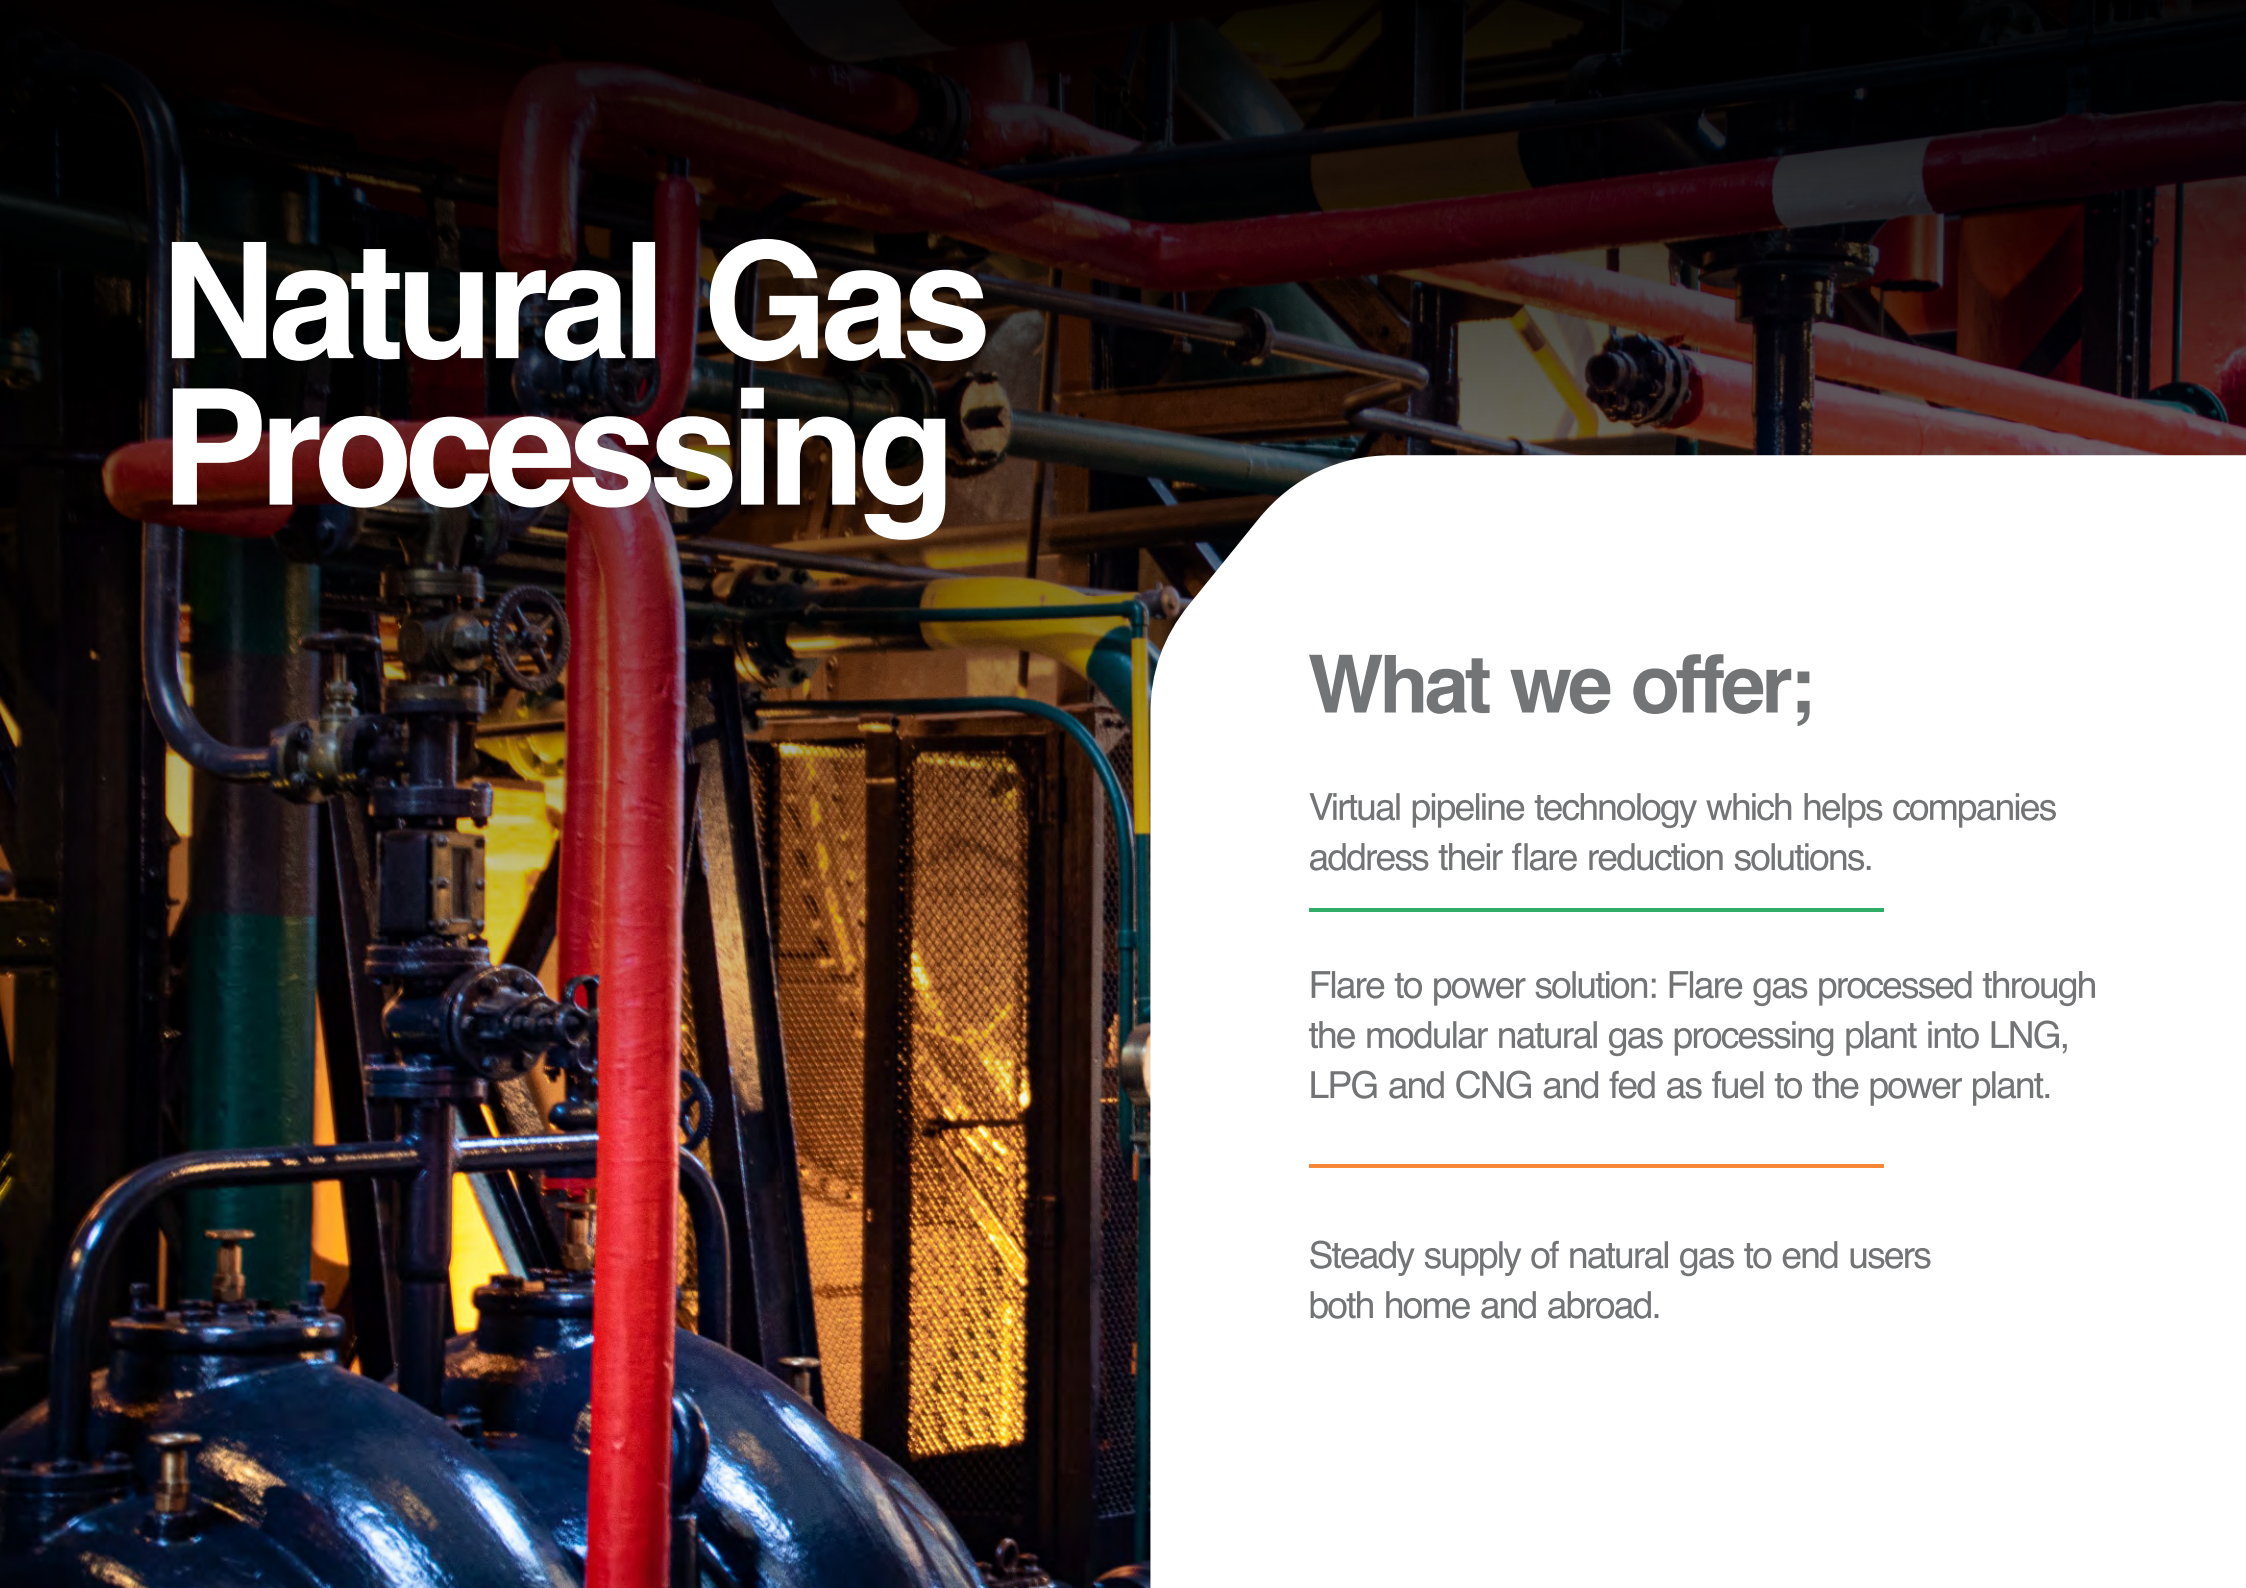

Raw gas is conditioned
and moved via virtual
pipelines (proprietary
technology)

Decompression Unit for Delivery
of Gas to Turbine or Genset

Natural Gas Processing

What we offer;

Virtual pipeline technology which helps companies address their flare reduction solutions.

Flare to power solution: Flare gas processed through the modular natural gas processing plant into LNG, LPG and CNG and fed as fuel to the power plant.

Steady supply of natural gas to end users both home and abroad.

Our Solutions are:

Efficient, easy to deploy and easy to operate.

Our Virtual pipeline eliminates the need for fixed gas pipelines to run gas turbines for power generation.

It also eliminates all the costs associated with building a fixed pipeline.

Effective for the reduction of flare gases

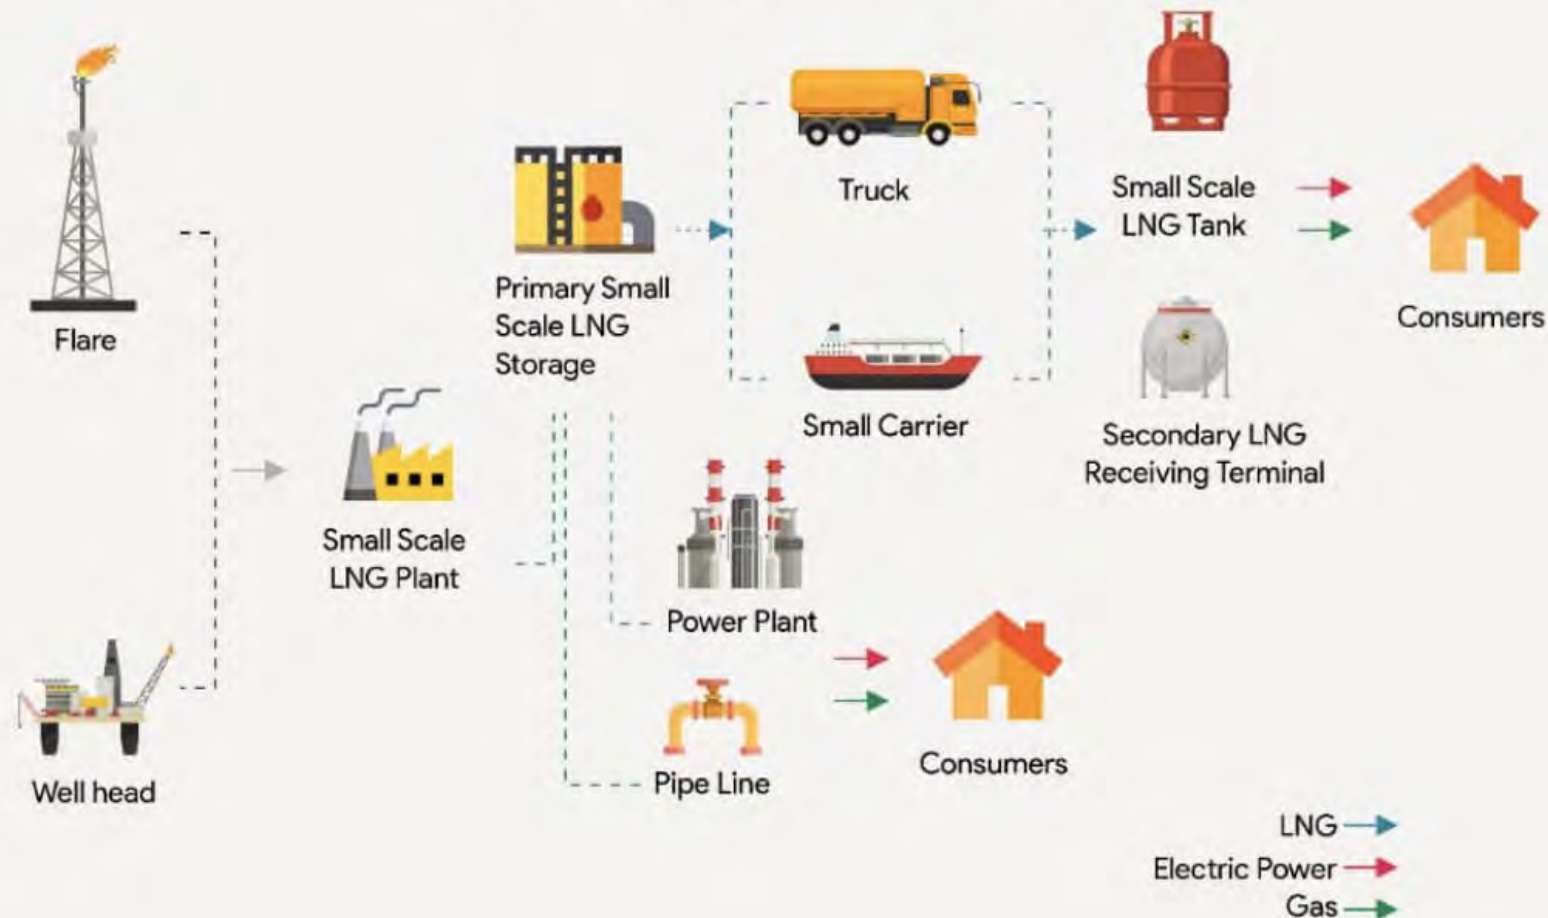

Lowers end user carbon footprint.

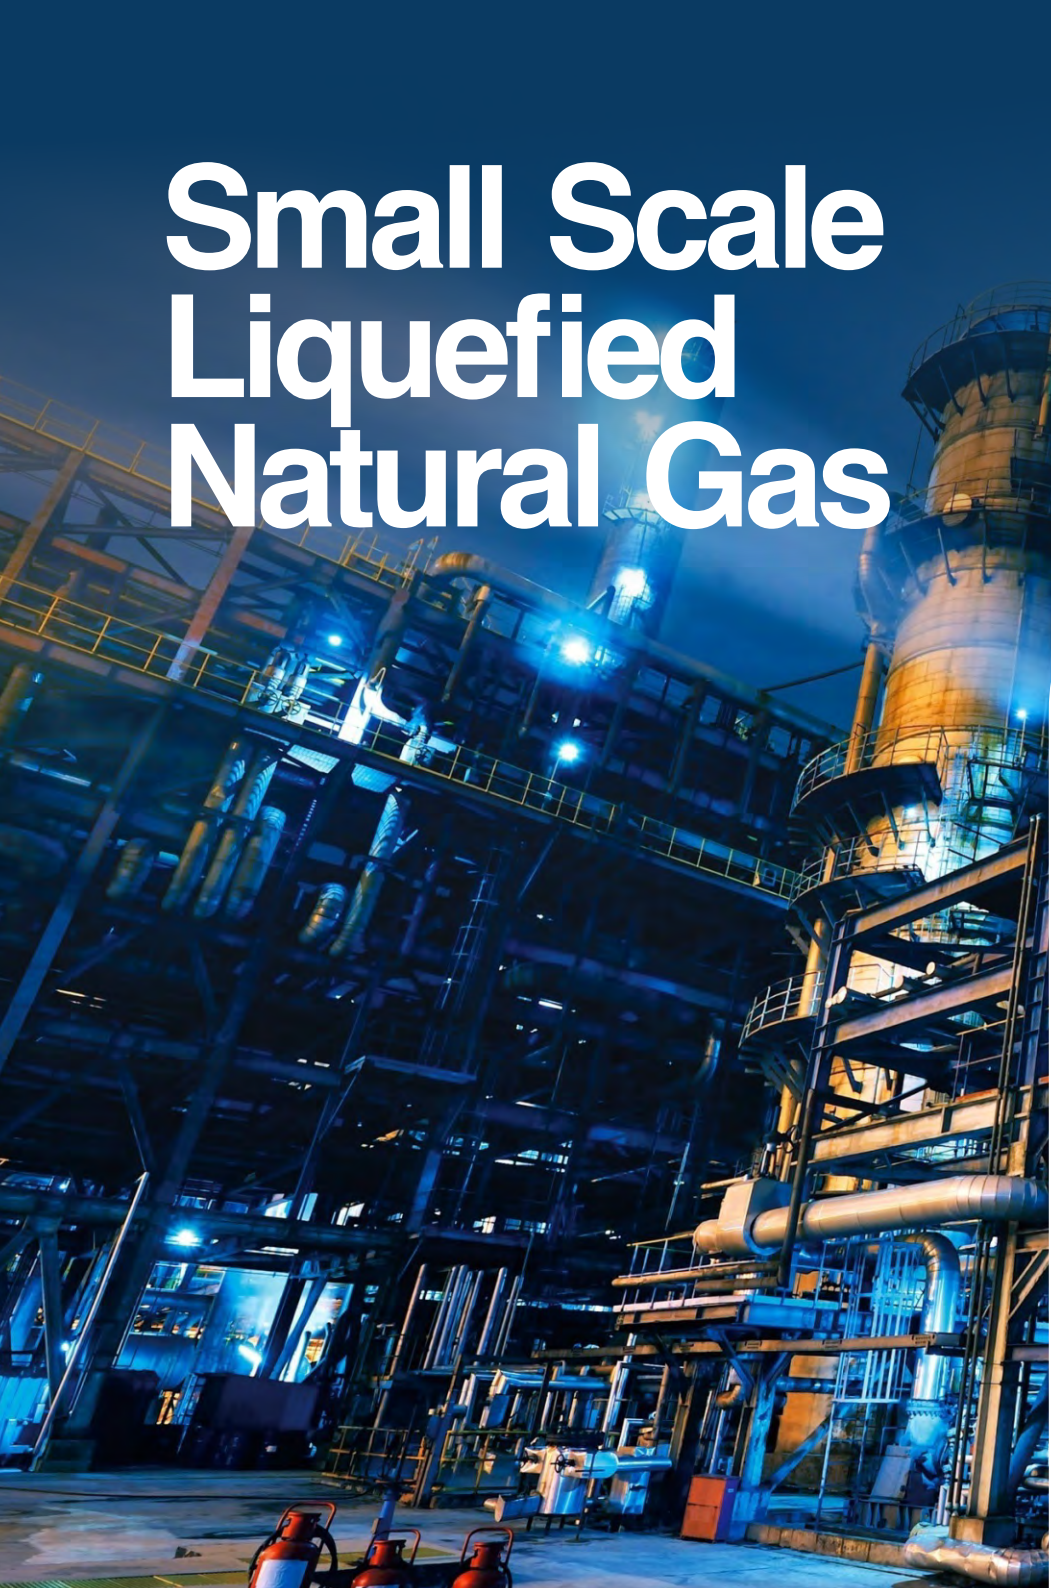

Units are scalable. The plant can be expanded as your needs for compressed natural gas grows.

Small Scale Liquefied Natural Gas

THE SMALL-SCALE LNG VALUE CHAIN

Small Scale Liquefied Natural Gas

What we offer;

Modularized gas processing facility that produces LNG and L PG from pipeline gas, wellhead gas or flare gas.

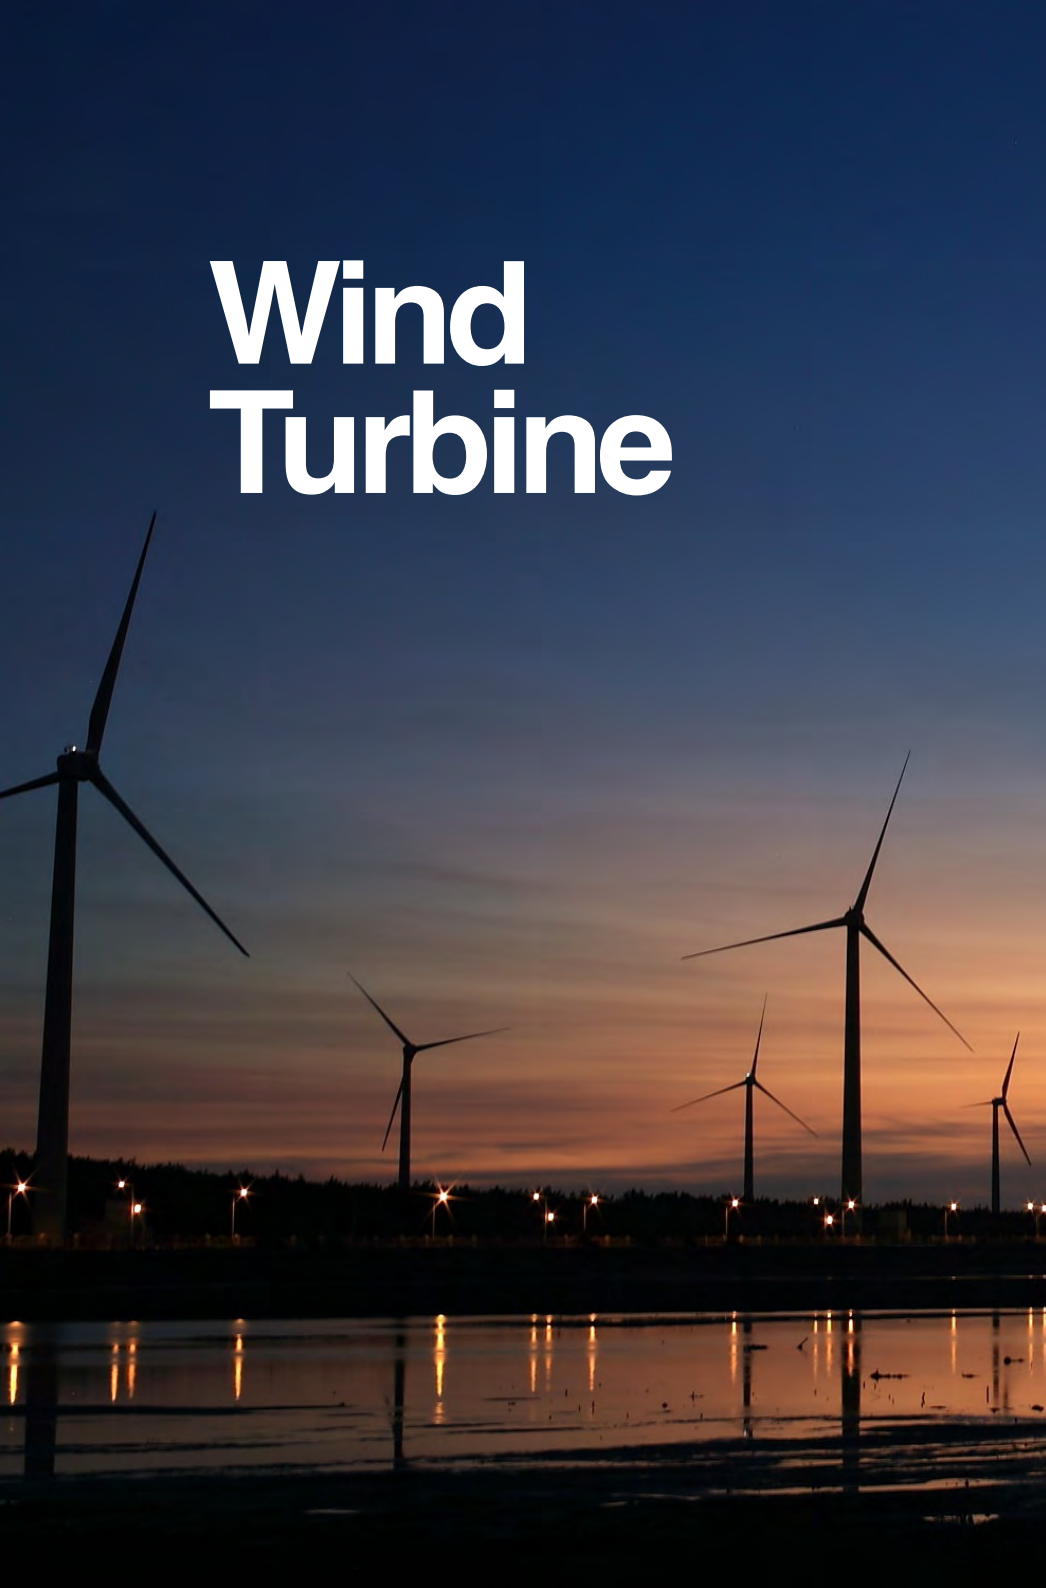

Modular storage units for LNG

Floating storage unit for quick deployment and ease of location, and cabotage vessel.

LNG terminals for filling ISO containers for distribution to end users.

ISO containers and regasification units for distribution of LNG.

Overall goal is to ensure a steady supply of natural gas to end users both in the home country and neighboring Countries.

A photograph of several wind turbines silhouetted against a sunset sky. The turbines are reflected in a body of water in the foreground. The sky transitions from a deep blue at the top to a warm orange and yellow near the horizon.

Wind Turbine

What we offer;

Wind turbines of various sizes and power ranges as low as 500KW for various project sizes. This ensures that we can provide wind turbines for small and off-grid locations.

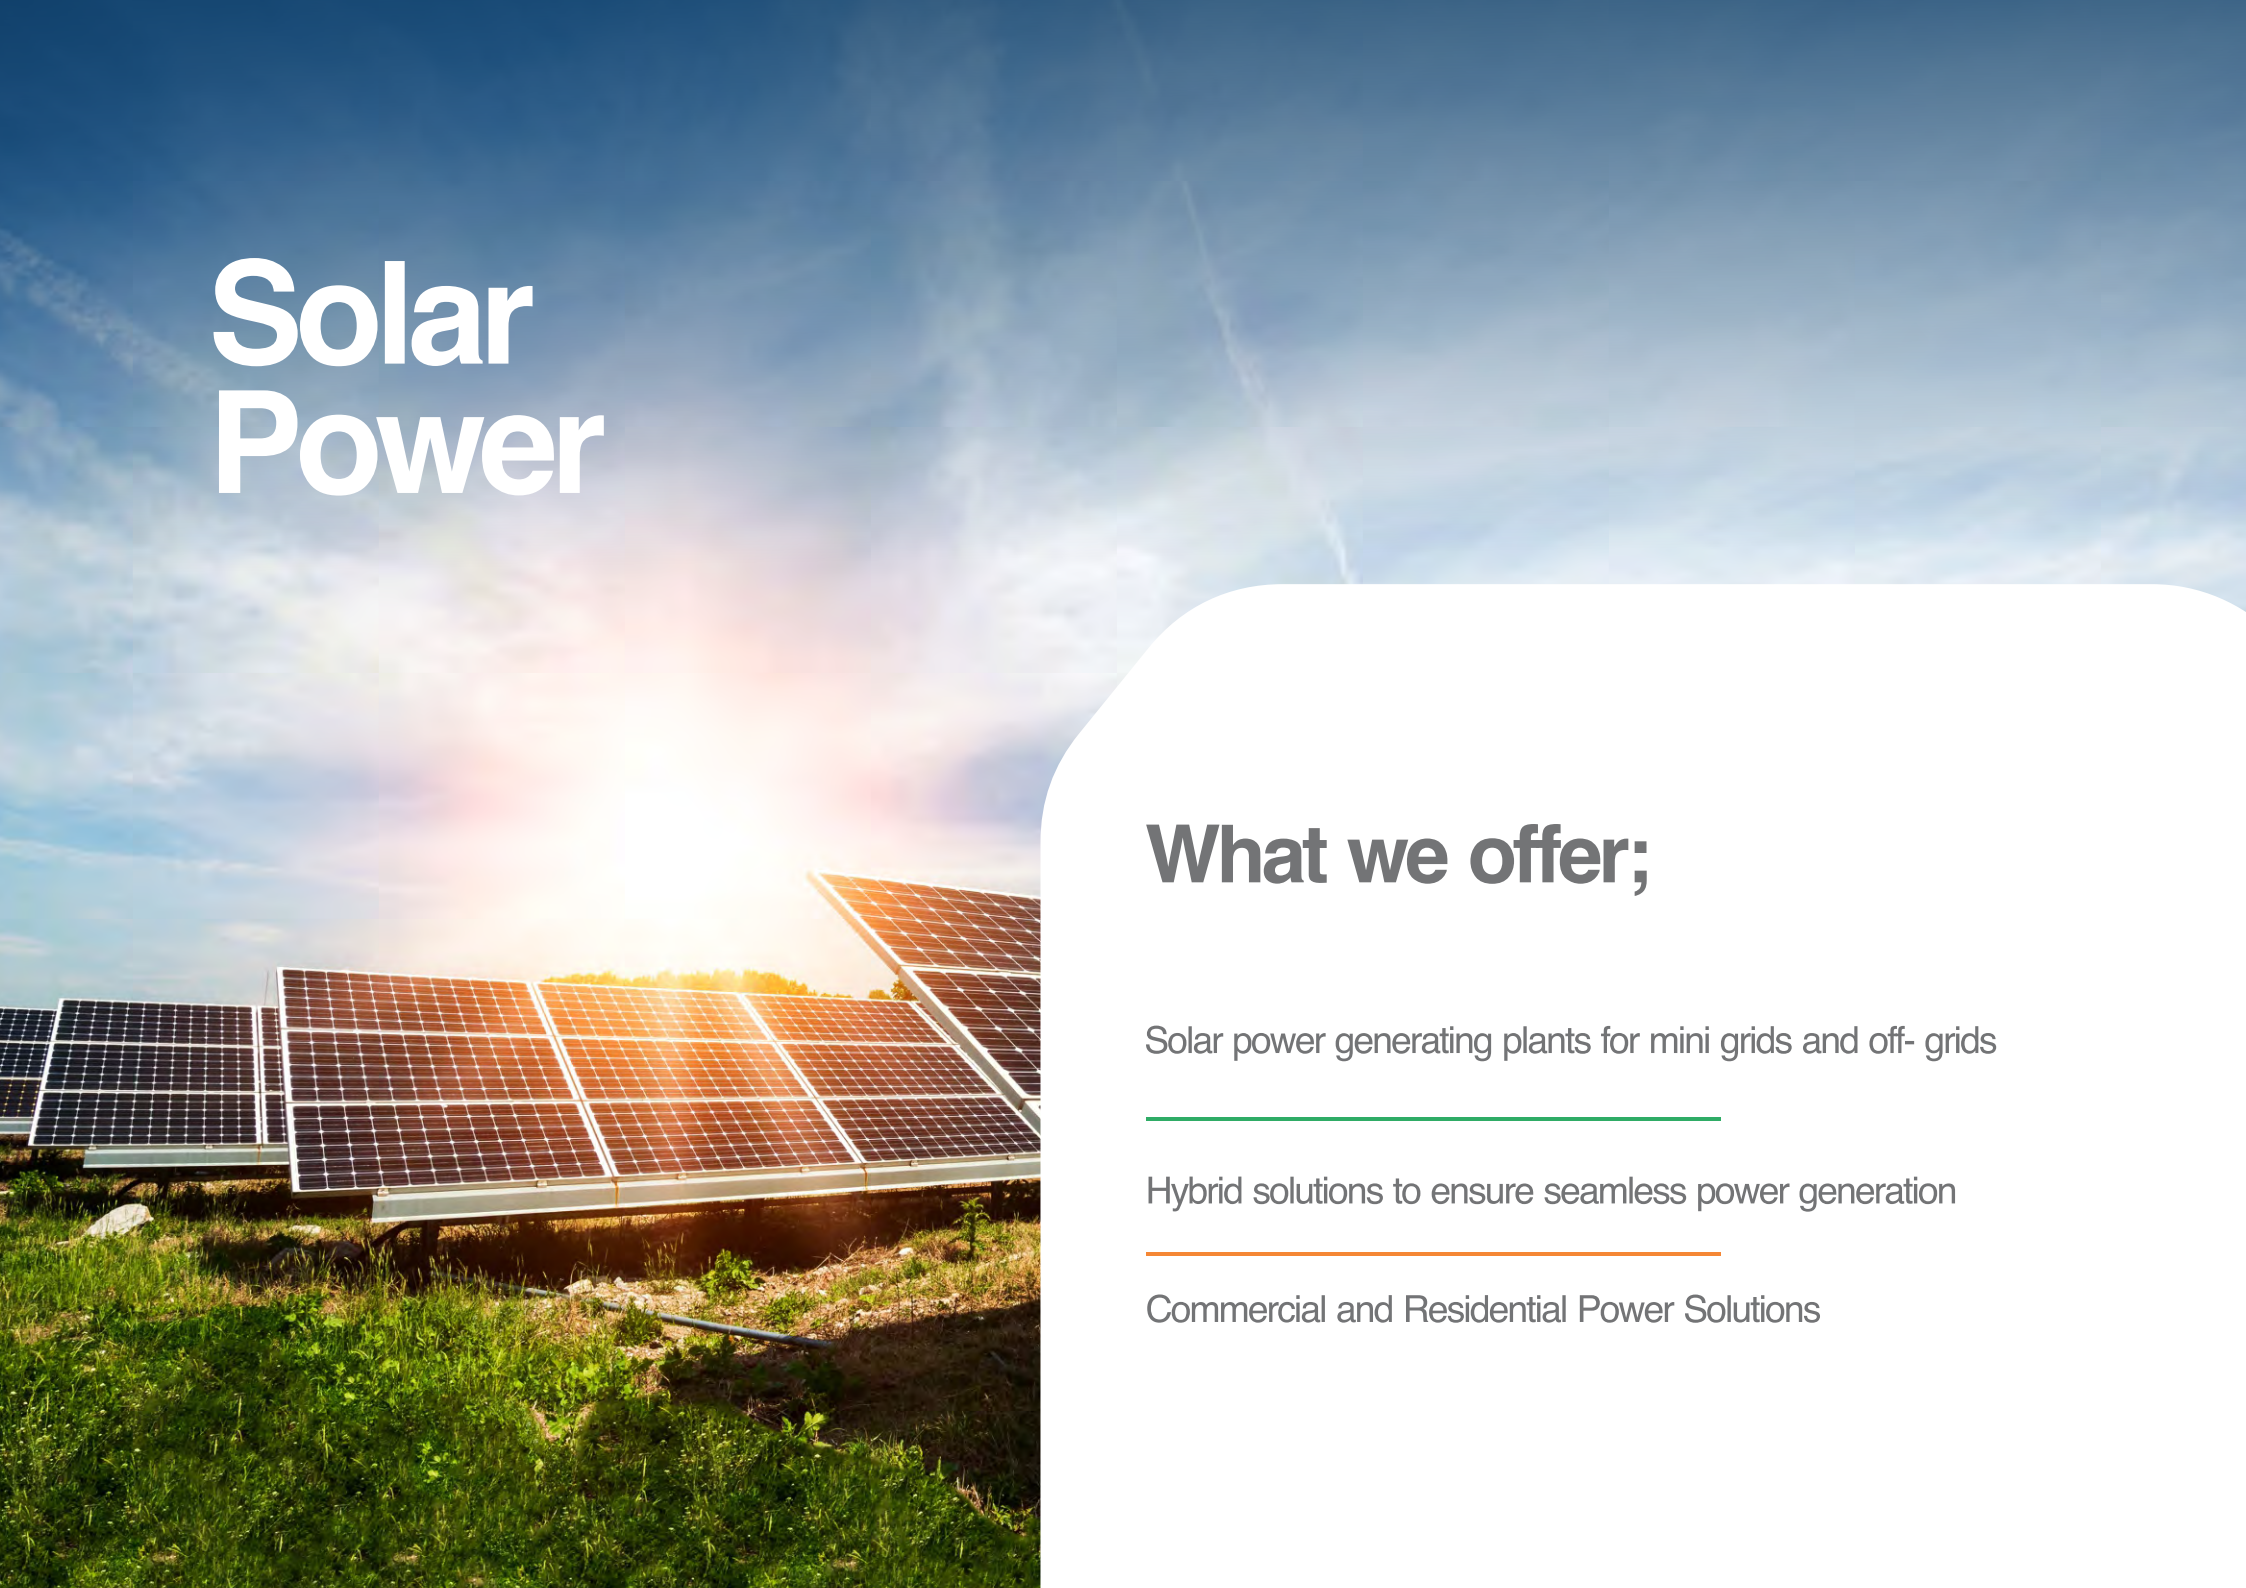

The wind turbines are for mid-size projects which are easy to install and offer quick rewards to the community.

The wind turbines offered to our clients can be onshore or offshore installations.

We offer Partnership opportunities with interested local investors

We offer a full value service to ensure complete performance of the equipment through its designed life cycle

Solar Power

What we offer;

Solar power generating plants for mini grids and off- grids

Hybrid solutions to ensure seamless power generation

Commercial and Residential Power Solutions

Energy Storage

What we offer;

Energy storage solutions for mini grid and off- grid systems to ensure uninterrupted power supply.

Hybrid solutions to ensure seamless power generation

Commercial and Residential Power micro-grid Solutions

Why IPP Global?

We maintain flexibility on our projects to enable us provide tailor made solution for our clients.

We offer full value service to ensure complete performance of the equipment through its designed life cycle

We work with Partners in the US to provide state of the art equipment across the world.

Why IPP Global?

IPP Global has the ability to put in place funding levers, business structures, regulatory framework, governance framework, and other requirements to ensure project success. IPP Global appreciates that different environments and clients require different solutions, and we are committed to providing solutions that are Relevant, Practicable, Realistic , and Future-proof with a design which is modular, scalable and easy to upgrade. We believe that IPP Global can contribute significantly to the achievement of your energy targets within the shortest time possible with our bespoke solutions.
